Smart Office Solutions

A wide-angle photograph of a modern office space. The room features dark wood paneling on the walls and ceiling, and light-colored wood plank flooring. Large windows on the right side offer a view of a cityscape. Several people are working at desks equipped with computers and ergonomic chairs. The lighting is a mix of natural light from the windows and modern, rectangular pendant lights hanging from the ceiling.

The modern workplace is evolving and flexibility is vital within the office management to cater to a more dynamic work environment. Our suite of products and services are designed to make the workplace more secure and productive helping you secure higher levels of efficiency for higher profitability and growth.

Our solutions can be tailored for businesses of any sizes from small enterprises to large corporates.

Invest in technology that makes your workplace more secure, energy friendly and highly efficient.

Board Room

The way companies conduct business is changing and in this today's globalized context, a highly equipped conference room provides the best in business collaboration.

Synchronize the projector, sound system, lights, A/C, blinds, etc and change the ambience of your meeting from a group discussion to a presentation theme with a touch of a button.

From wireless streaming of presentation files, interactive screens to video conferencing systems, we have got it all to make the most out of your corporate gatherings.

Digital Door Lock

Maximum security with added convenience of being able to access easily through fingerprints, passcode or key tag.

Lighting

You can have the lights automatically switch off for a presentation or set lights to desired level for a video conference.

Blinds

We deliver precise, convenient control of daylight, all at a touch of a button.

Automated shades increase the value of boardroom as well.

Interactive Screen

Businesses require graphics and visuals to effectively communicate ideas in a meeting.

Our interactive screen with 4K resolution provides you with the ability to interact with ideas in a whole new way.

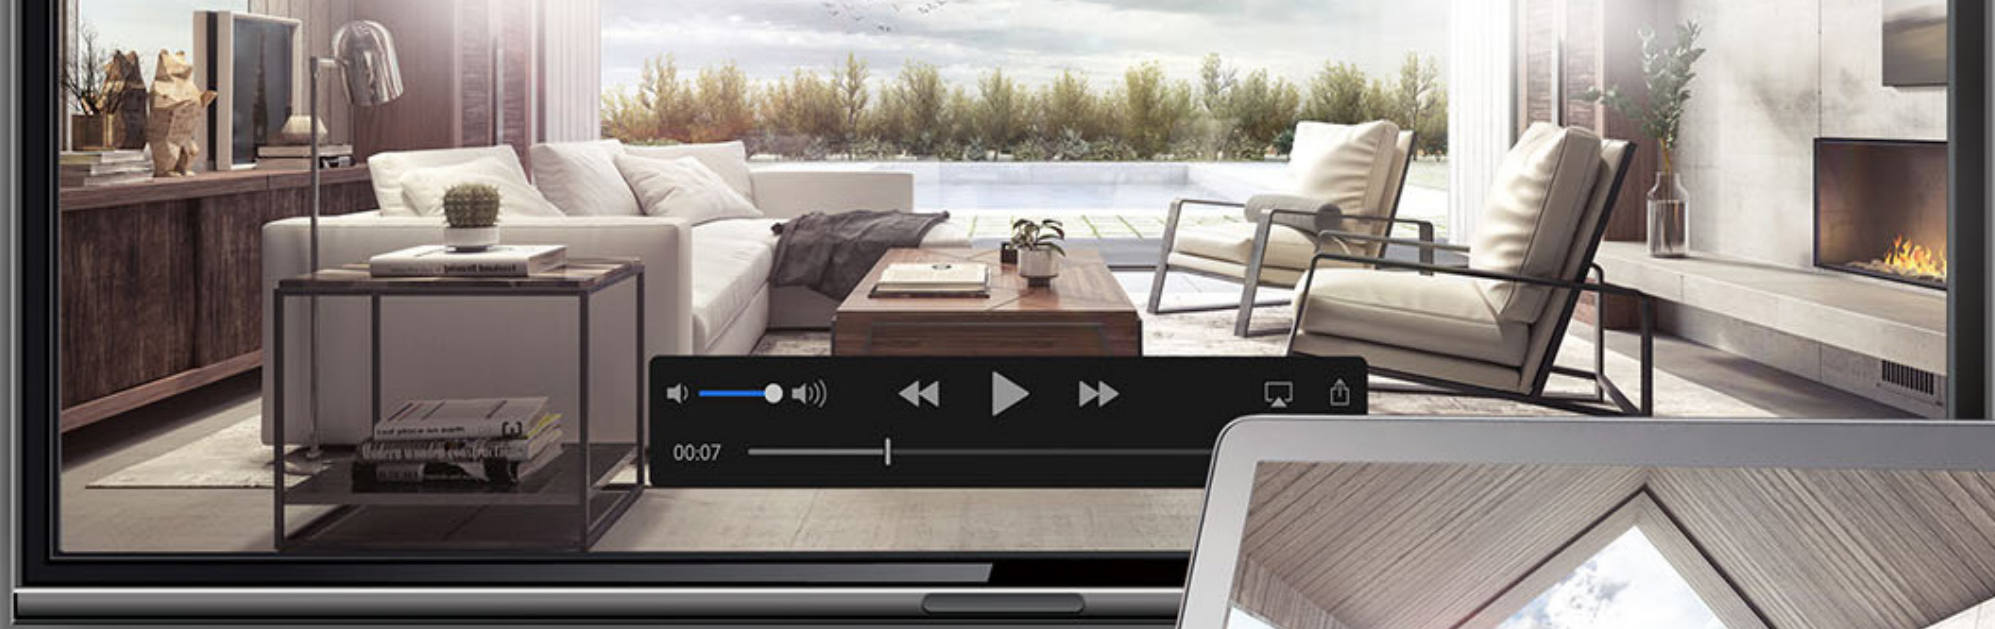

Universal Remote

A high stake business meeting requires complete attention to the agenda.

Set the perfect ambiance in the conference room at the touch of a button with our climate control system.

Wireless Presentation

Wireless presentation makes content sharing easy with no interruptions from changing presenters.

Improve collaboration during meetings and enable multiple presenters to share ideas, concepts, and media without having to plug in a long cable.

A photograph of a conference room with a long wooden table. Several gooseneck microphones are positioned along the table. The room has wood-paneled walls and a large screen in the background. The lighting is warm and focused on the table.

Sound System

Quality of sound is of paramount importance when it comes to conference calls, conducting trainings and workshops.

Our sound system offers the very best ensuring high quality audio for your meetings.

Video Conference

The best in video conferencing system eliminates the need of expensive travel and creates greater opportunities for collaboration from the confines of a spacious conference room.

Executive Cabins

The ambience to focus

Create the best in executive class cabins with customized control of lights, AC and shades so that you work smarter and more efficiently.

Security

Office security is one of the most fundamental concerns for businesses, irrespective of their size. Any threat to the office assets or employees results in heavy losses.

While security may sound simple, it requires a great deal of planning. Our solutions provide a comprehensive security package based on the size and nature of businesses.

Surveillance System

Installing security cameras helps to ensure proper management and security of your workplace. Constant monitoring makes it impossible for unwanted activities to go undetected, so the latest in CCTV technology is always a must have.

We provide a comprehensive assessment for an optimum solution for your office. Our CCTV systems can also be installed wirelessly for existing spaces.

Access Control System

Access control systems are integral security assets which helps in minimizing the risk of unauthorized access to different areas of the office.

With the help of the access control system, track each exit and entry that happens throughout the day. Whether your business works for set times or for 24 hours, there is guaranteed security.

Fire Alarm System

Fire accidents cause hundreds of millions of dollars in damages every year, making this one of the most important safety issue for business owners to address. Fire safety is a long-term investment that must be carefully planned to ensure safety of you employees and protect your assets.

Our fire alarm system equips offices with smart sensors that pinpoint the exact location of the fire to minimize the danger to life and the damage to property.

Energy Management

Energy waste from unnecessary consumption is one of the biggest reasons for high electricity bills. With businesses shifting towards greener practices, efficient energy consumption not only reduces bills but also contributes towards a sustainable environment.

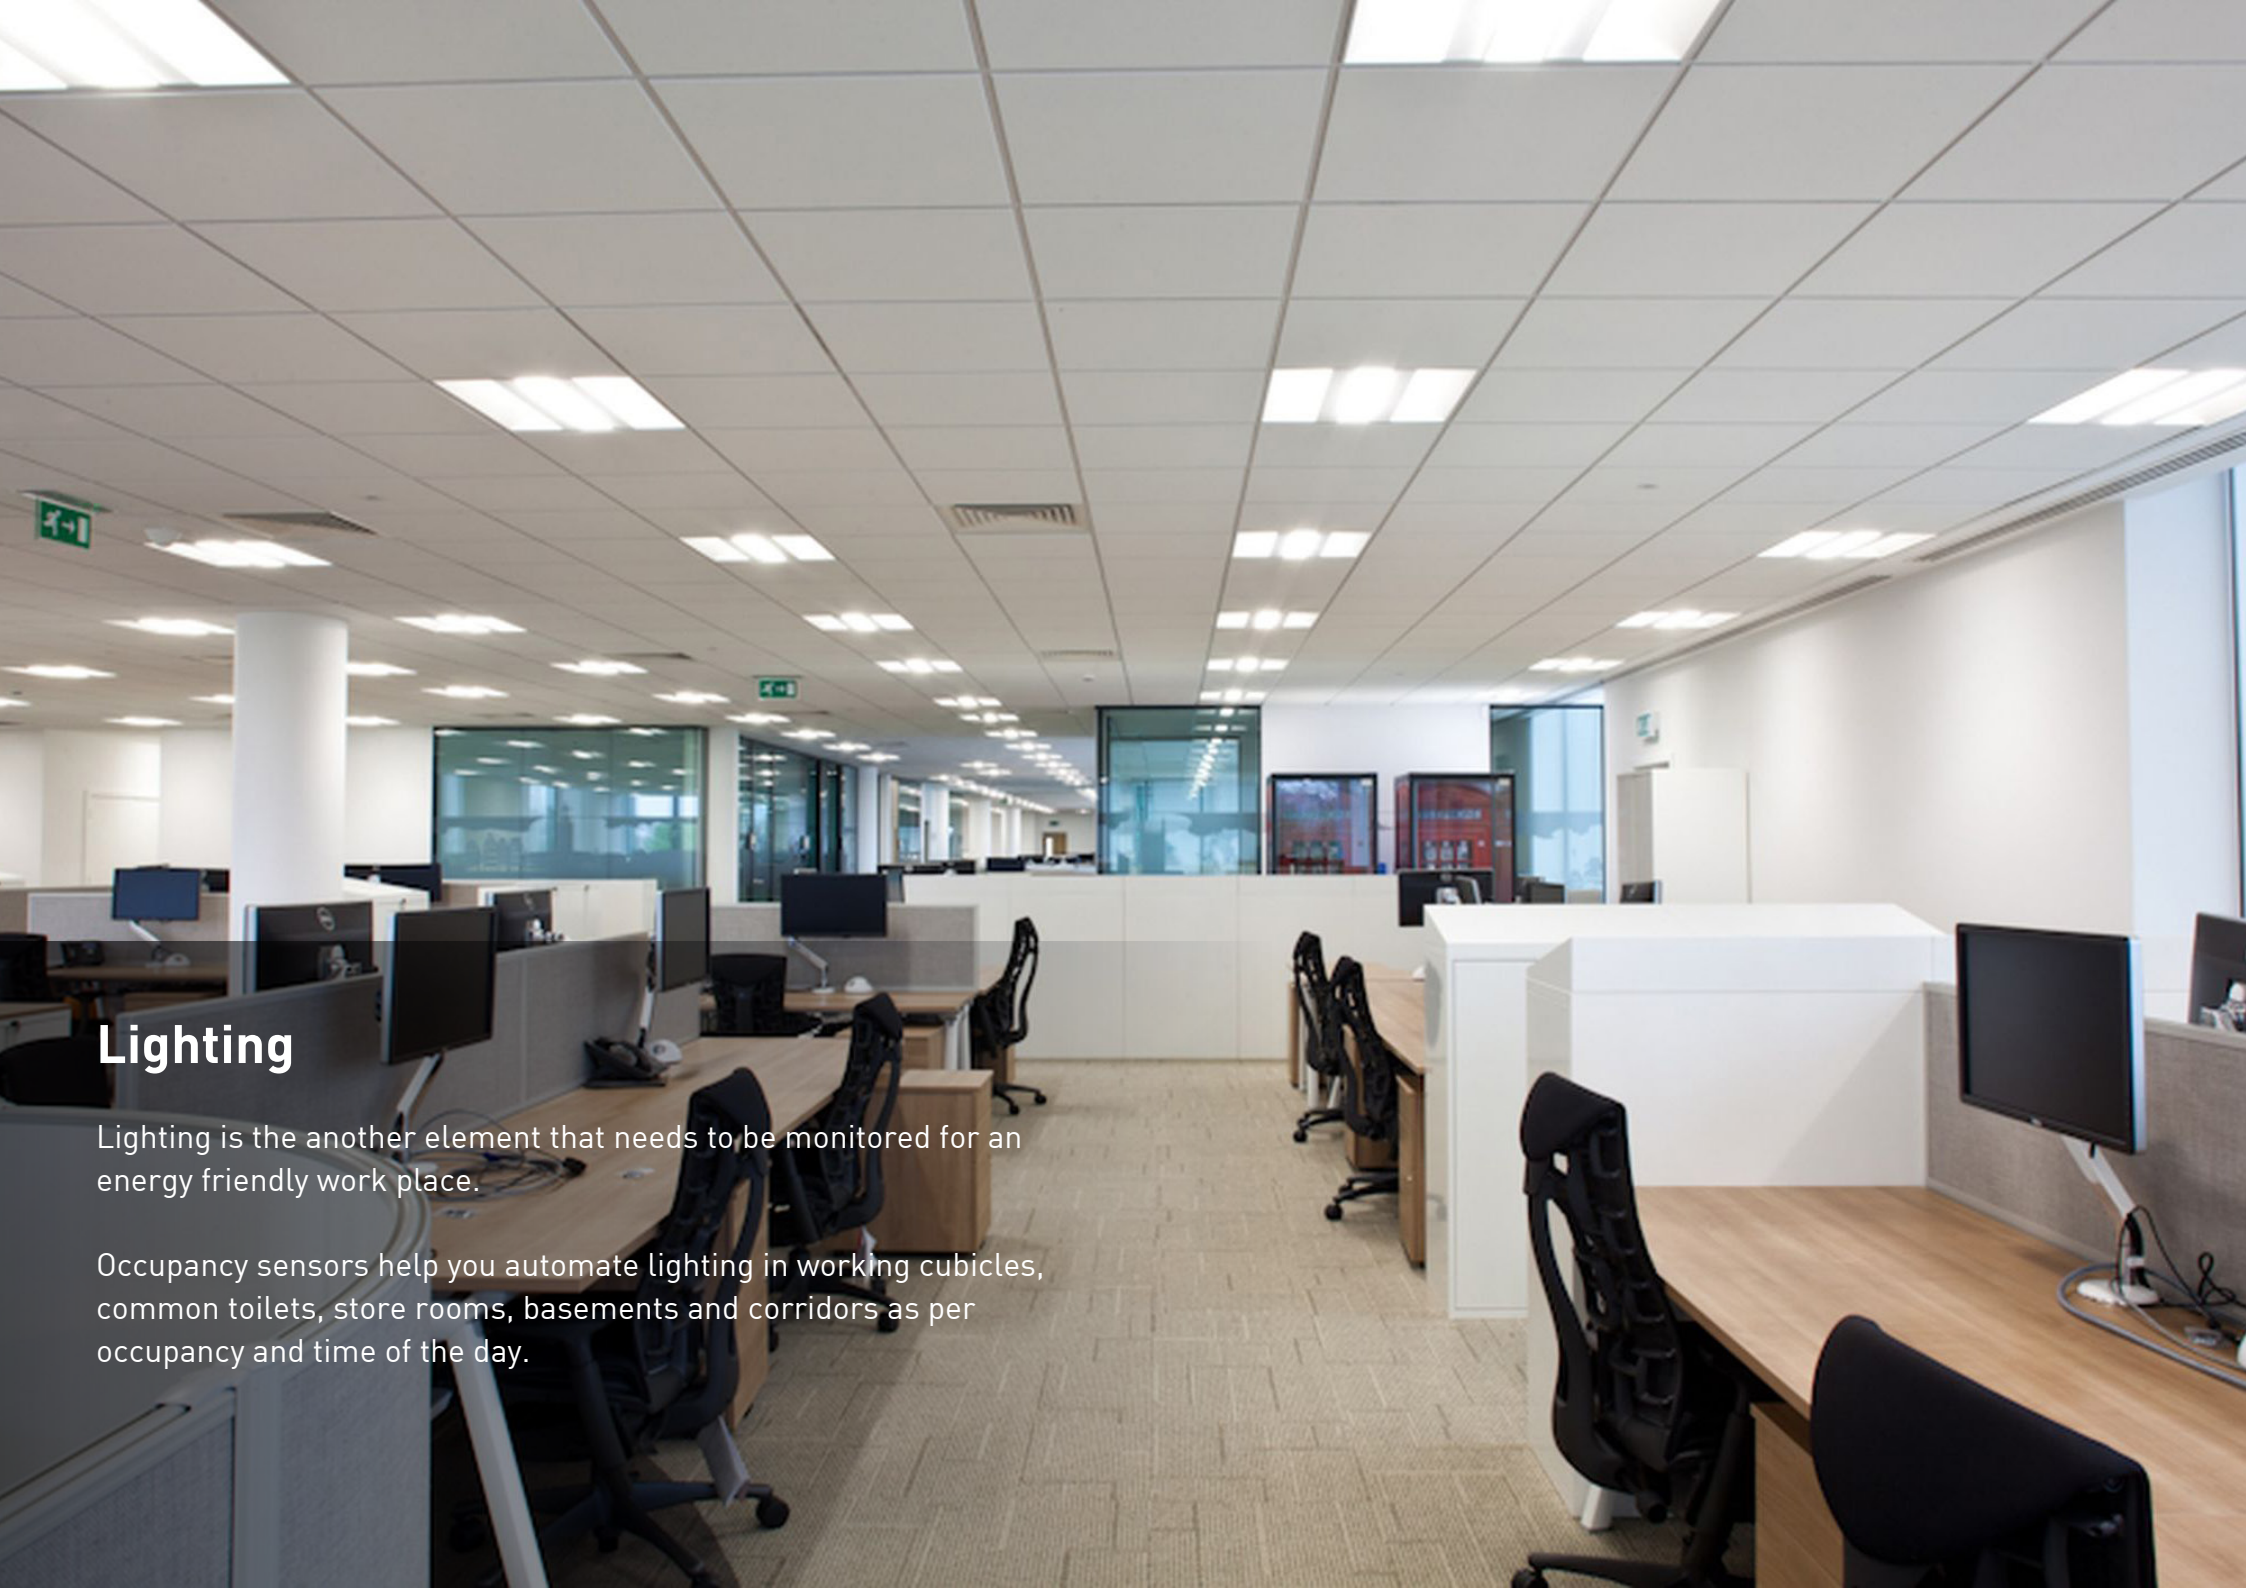

Air Conditioning

Air conditioning system is one of the highest energy consuming components. Unchecked and unsupervised use of air conditioning system results in high energy bills.

Our solutions enable you to schedule your AC units to switch on at a certain temperature and certain time of the day and switch off during lunch breaks and after working hours.

Lighting

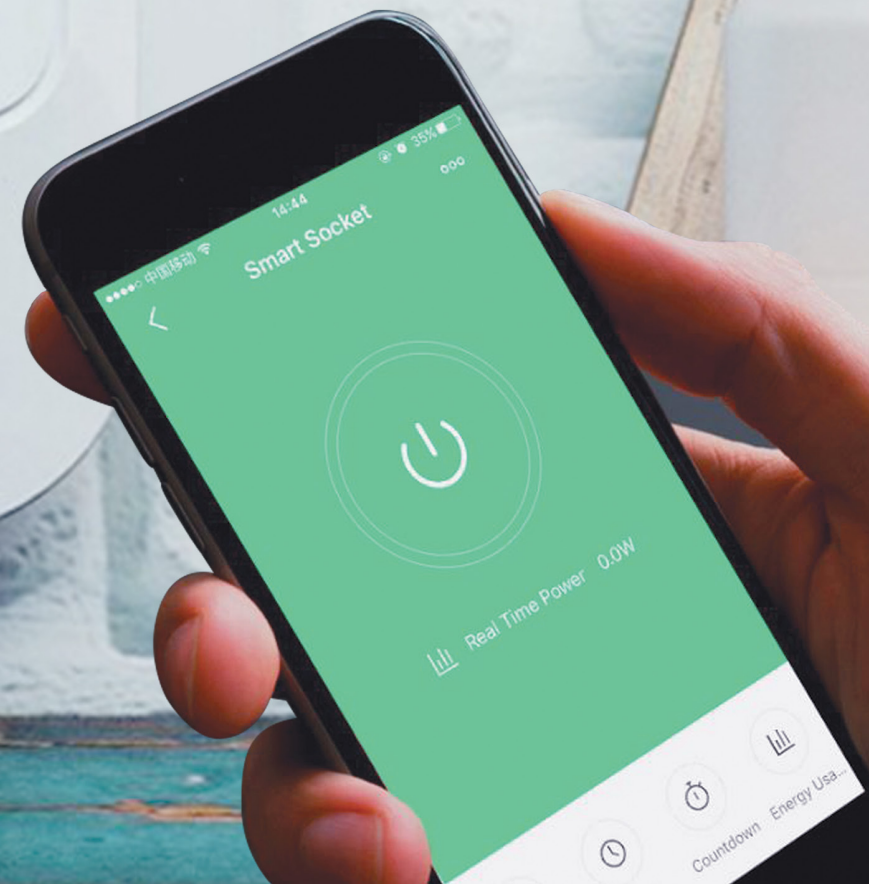

Lighting is the another element that needs to be monitored for an energy friendly work place.

Occupancy sensors help you automate lighting in working cubicles, common toilets, store rooms, basements and corridors as per occupancy and time of the day.

Power Socket

When not in use, electronics and appliances such as desktop computers, printers, water dispensers, etc. on standby mode continue to consume electricity.

Though a small when compared to that of AC and lighting, they draw a significant amount of power overtime. Using smart power sockets drastically reduces this energy leakage and ensures optimal energy savings.

Home Automation
Nepal
